Dream Home

Windows tinted making lowers prices of heating bill.

Open stairwell producing an easy heat flow through the household.

All lights are florescent saving cost on electric bills and making lights last longer

Tree and plant preservations helping provide winter wind breaks and the owner doesn't have to use fertilizers and other chemicals that are harmful to the earth

Energy saving appliances such as the refrigerator, the dishwasher, washer and dryer, etc.

Light house color reducing cooling cost in summer, but a dark roof attracting heat to areas in house that need it. Especially in the winter. Weight room, bedrooms

Automatic lights in house that turn off when on to long with remote, to also save electrical costs.

Room placement is key.
